MARIUS VAN DER BUSSE

FRONT-END DEVELOPER

PERSONAL PROFILE

I am a front-end developer with a full stack mindset. Everyday I am learning about new technologies and ways to improve my existing skill set.

EDUCATION

Haaga-Helia UAS

Bachelor in Business Information Technology

August 2017 – Present. Estimated graduation: December 2020

- Learned about IT topics such as UX design, front-end, back-end and IT infrastructure.
- Being exposed to general IT management methods such as Agile.

Windesheim UAS

BA Financial Services Management

September 2013 – January 2018

- Learned about several financial products and Dutch taxation law.
- Thesis involved making a risk assesment of Bluet Oy.

PROJECTS

Ticket venue database

October 2019 – December 2019

For my data management and database course, we had to develop a database in pairs according to the case assignment. We went through the whole process of database development. This means we started off with creating the conceptual model and developed it into an ER-diagram and later on to a relational schema. We performed relation validation to ensure the validity of the schema's and eventually built it with a physical database schema. Created in Microsoft SQL Server.

Personal trainer portal

October 2019 – December 2020

For my front-end development course, I made a personal trainer portal with React.js. The portal uses an API from Heroku and allows for CRUD operations. Designed with material.ui and can be seen from my portfolio (www.mariusvanderbusse.nl)
